

Your ERP gives you a strong operational backbone. StockIQ adds the planning intelligence layer—bringing forecasting, replenishment, and supplier collaboration to the next level with AI + automation.

AI-Powered Demand Forecasting

Go beyond historical averages. Use event-aware forecasting, anomaly detection, and machine learning models to predict demand with precision.

Automated Replenishment

Keep inventory flowing with AI that dynamically adjusts reorder points, lead times, and safety stock based on real-world disruptions.

Supplier Performance & Tariff Awareness

Monitor supplier reliability, landed costs, and tariff impacts with built-in scorecards and alerts—helping you make smarter sourcing decisions.

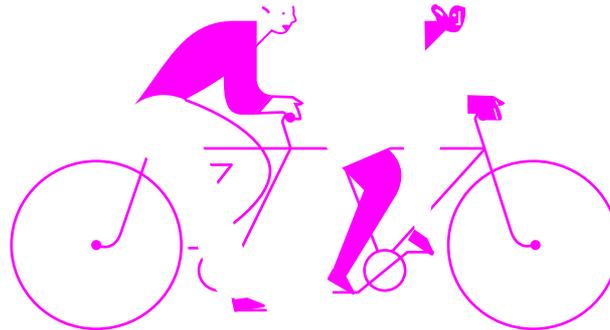

Integrated S&OP

Bring finance, sales, and operations together with collaborative, AI-informed plans that align across your Dynamics environment.

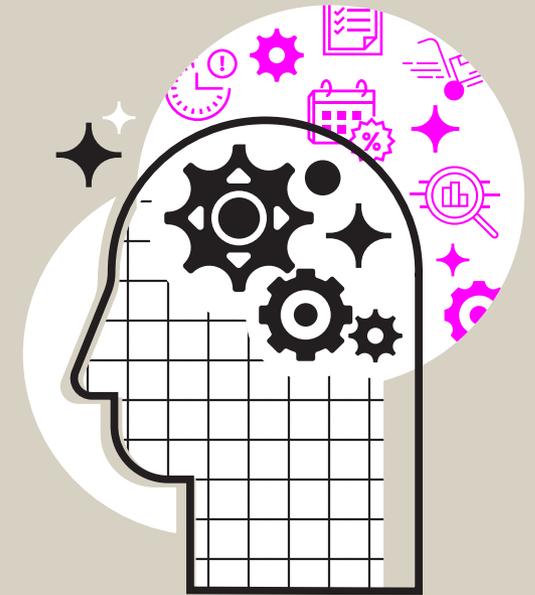

Inventory Optimization

Identify long-tail SKUs, cut dead stock, and reallocate resources—freeing cash while improving service levels.

AI + IQ: Smarter Inventory, Powered by People

StockIQ is the smart supply chain planning platform to enhance your ERP's demand forecasting, MRP, and reporting capabilities. We blend proven AI capabilities with human expertise, helping you make smarter, faster inventory decisions.

StockIQ in Action

Distributors and manufacturers using StockIQ typically see:

30%

Reduction in inventory

50%

Reduction in stockouts

70%

Decrease in planning time

Native integrations:

Direct API connections to Acumatica to ensure data flows seamlessly, without burdening your IT team.

Up to Date:

StockIQ is currently certified for 2025R2 and regularly completes certifications for new versions of Acumatica as soon as they come out

Built by supply chain experts:

80% of our team comes from planning and operations roles. We understand the daily challenges of distributors and manufacturers, because we've lived them.

AI-powered forecasting:

In-house models improve forecast accuracy, detect anomalies, and flag reorder behavior, giving you control and confidence.

Enterprise functionality without the price tag:

Demand, inventory, supplier planning, and promotions all in one package – without hidden fees.

Fast time to value:

Go live in 10–14 weeks with full-service onboarding and prebuilt Dynamics integrations.

Future-ready scalability:

Extend your Acumatica ERP with a platform designed to evolve with new challenges – from tariff impacts to AI-driven automation.
